

Innoviti payezee is Runner's Up at Wireless Innovation Contest

Bangalore, Mar, 2007: Innoviti Embedded Solutions, a leading wireless products company in the payment space, today announced that their flagship payezee product was placed Runner's Up at the Wireless Innovation Contest, held at CTIA, in Orlando in March 2007.

The payezee product allows point-of-sale (PoS) terminals to be made mobile through the addition of Innoviti's payezee module, providing for enhanced customer experience in pay-at-table and pay-at-car applications.

The payezee solution is based on 802.15.4 technology and is designed as a low-power, high-range solution, that helps improve battery life of PoS terminals by 100% and improves their range by over 6dB. It has won design wins with many leading OEMs.
